

**Dr Jeremy Grimshaw** is an internationally recognized leader in implementation research. He received his MBChB (MD equivalent) from the University of Edinburgh, UK and trained as a family physician prior to undertaking a PhD in health services research at the University of Aberdeen. He moved to Canada in 2002. His research focuses on the evaluation of interventions to disseminate and implement evidence-based practice. Dr. Grimshaw is a Senior Scientist, Clinical Epidemiology Program, Ottawa Hospital Research Institute, a Full Professor in the Department of Medicine, University of Ottawa and a Tier 1 Canada Research Chair in Health Knowledge Transfer and Uptake.

He is a Fellow of the Royal Society of Canada and the Canadian Academy of Health Sciences and a Corresponding Fellow of the Royal College of Edinburgh. He has received the CIHR Knowledge Translation award twice; in 2004, he received the inaugural award for his personal contribution to the field and in 2013 Cochrane Canada (under his leadership) also received the award. In 2018, he received the CIHR Barer-Flood career achievement award for Health Services and Policy Research. He has over 650 peer reviewed publications. Since 2015, he has consistently ranked as a Thomson Reuters Highly Cited Researcher, based on the high citation rate of his published work.

## «Evidence is not self-implementing: building the science for implementation»

Implementation research is a relatively new field of health services research. In this talk, I will: outline the implementation challenge (the evidence-practice gap); the research areas addressed in implementation research (with examples) and reflect on the progress and challenges in developing this field of research.
